## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by August et al or Romero et al. The device of August et al or Romero et al is inherently employed in a closed loop refrigeration circuit, which are known in the art to comprise a heat radiating section (condenser), a heat absorbing section (evaporator), pump (compressor) and expansion device (optional).

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over August et al or Romero et al in view of Applicant's Prior Art Admission in Figure 1.

August et al or Romero et al discloses all the claimed limitations except a closed loop refrigeration circuit.

Applicant's Prior Art Admission in Figure 1 discloses a heat radiator comprising a closed loop refrigeration circuit having a heat absorbing element 52; a heat radiating element 58 and a pump 56 for the purpose of maintaining the operating temperature of the electronic device 54.

Since August et al or Romero et al and Applicant's Prior Art Admission in Figure 1 are both from the same field of endeavor and/or analogous art, the purpose disclosed by Applicant's Prior Art Admission in Figure 1 would have been recognized in the pertinent art of August et al or Romero et al.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to employ the device of August et al or Romero et al in a closed loop refrigeration for the purpose of maintaining the operating temperature of the electronic device as recognized by Applicant's Prior Art Admission in Figure 1.

### *Conclusion*

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
